Green Building Label — Required Documents

Greenery indicator · checklist of documents to submit with the application · sample checklist

Document	Status
Greening quantity report (TCO2 calculation)	required
Planting plan with every species named	required
Plant schedule with species, quantities, soil depth and pit area	required
Tree pit and soil depth details for artificial ground	required
Site plan showing areas excluded from greening (fire-truck space, driveways)	required
Existing tree survey and tree protection plan	if existing trees are affected

The greening quantity report shows TCO2 = (ΣGi × Ai) × α against TCO2c = 0.5 × A′ × β (Building Technical Regulations, Design and Construction, §302), with the inputs read from the planting plan and the plant schedule.
